

NATURINA BIO-ACTIVE CARE

- Strong & healthy hair
- Bio-active care products
- Beauty from within

NATURINA Shampoo

Healthy hair looks good. It underlines your personality and stands for vitality. You can see a lot about people from their hair. People who make the most of their hair make the most of themselves.

Many factors influence our nutrition intake - stress, sport, eating habits as well as our own personal lifestyle - which we need to form the nutrients in our body like carotene. Carotene is needed to encourage hair and nail growth and also assures a healthy skin.

The body needs a well-balanced and sufficient intake of vital nutrients. If there is no such intake then the balance is lost. Thus: we must take care and pamper ourselves with NATURINA care products. Most shampoos contain chemical substances. Of course they clean the hair but often cause a great deal of damage.

A good shampoo and a good hairtonic both care for and strengthen the hair right from the start. Greasy hair and dandruff are prevented. The scalp gets a better circulation, the cells are protected and the roots are stronger.

For an attractive radiant look, beauty and well-being for both your work and leisure time

NATURINA Shampoo and Hairtonic are bio-active care products. Finely tuned to work with NATURINA Capsules.

NATURINA Shampoo and Hairtonic contain all the natural and mild ingredients in sufficient supply and sensible amounts. In order to prevent allergic reactions and skin irritations there are no chemical additives, no perfumes or conserving agents and they are pH neutral.

We can't promise miracles. 'New' hair can only grow when the roots have remained capable of growth. But with regular use of NATURINA Shampoo together with NATURINA Hairtonic hair problems can be prevented early. It is hair care for the whole family.

Hair must be cared for both from within and without. For an effective hair care a hairtonic should be used, as it has the nutrition function for the hair. Other products do not fulfil this purpose.

In addition to hair care with NATURINA Shampoo and Hairtonic: NATURINA Capsules for care from within.

NATURINA Hairtonic contains vitamins to activate the scalp. The special active ingredients like pirotoneolamine work against dandruff - as well as niacin, menthol and the extract of horse chestnut for better circulation. Cystine as an important component of the hair building substances, Keratin which assures the elasticity of the hair. Only substances from ethereal oils give NATURINA Hairtonic its perfume.

Our products are tested dermatologically. We only use natural raw materials - no chemical additives. We reject the use of any animal substances.

NATURINA is a bio-active care series with vitamin E, the series includes shampoo, hairtonic and capsules. For many years now we have carried out intensive research to improve our products - and we can rightly say that we are at the most up-to-date level of development.
